My passion is in the creation of modern, well designed websites, emails and graphics. I am diligent in making sure that the client is satisfied and their every expectation is met. I strive for perfection and I am always eager to learn and adapt.

## Experience

### ***The Channel Company / LauchlanX*** - Remote Position

Senior Front-End Web Developer

December 2021 - Present

- Worked within Wordpress, Marketo and Drupal to create beautiful, effective landing pages that live up to modern day standards.
- Created fully customized microsites with unique navigation, dynamic design and responsive layouts meant to grab attention and capture leads.
- Facilitated the combined use of web pages and forms, with tracking tools such as Google Sheets, Tag Manager, Looker Studio and Zapier. I adapted our processes to these technologies in order to better serve our clients and our company in staying relevant in the technology sector.
- Followed brand standards in creating websites and emails for companies such as Dell, Redhat, Equinix, Acer, Nvidia and many other technology based companies.
- Worked closely with design, digital and project management teams. As a result I became well practiced in the procedures of working in a fast paced environment that expects our products to be made well and on-time.

### ***Computer Professionals*** - Wainscott, NY

Web Administrator - IT Technician

January 2015 - December 2021

- Designed and Developed websites using content management systems, such as Wordpress.
- Repurposed and created themes utilizing custom HTML, CSS and plugin implementation.
- Wrote custom functions and web applications using JavaScript, PHP and MySQL.
- Managed domain, hosting, DNS, database, FTP and email services.
- Resolved any issues relating to the setup or repair of websites, computers, networks, software, email services and malware removal.
- Installed and configured routers, switches, access points, and mesh systems in business and residential settings.
- Trained non technical users in utilizing newer technology, systems and software.

### ***Freelance Web Development / IT*** - Long Island, NY

October 2014 - Present

- Developed and coded multiple websites for local businesses and charity events.
- Restored existing websites and taught their owners how to fully utilize their CMS capabilities.
- Assisted in securing email addresses, bank accounts, networks and computers after they had been compromised by malicious software.
- Assessed and replaced wireless systems for households in need of a faster, more stable network.
